HOW TO MEASURE BODY IMPRESSIONS:

1. Remove blankets, sheets and mattress pad before measuring.
2. Place yardstick or broomstick across the location of body impression(s), (the hip area is usually deepest)
3. Using a ruler, measure the depth of impression from deepest point of mattress surface to the edge of the yardstick.
4. Measure from the center of padded area of quilting, not the seams of the quilting threads, so that measurement will be accurate.
5. It is best if you place a piece of paper, or something solid, on the bed to measure to.

Please take measurements from top surface of mattress, then flip mattress (if you have a two-sided bed) and measure again. Please note these measurements in the diagrams above. These accurate measurements will enable us to process your claim efficiently.

ADDITIONAL REQUIRED DOCUMENTATION:

Since an in-home inspection cannot be made, *five photos are required*: 1. the frame the bed sits on; 2. box spring; 3. top mattress; 4. two photos of the defect. If the defect is a body impression, you **MUST** show the actual depth of the impression in your photo. No decision can be made without the required photos.
